

LIFE IS TOO SHORT FOR BORING LIGHTING

WEVER & DUCRÉ
LIGHTING

“From Belgium with love”

Delicious waffles and chocolate prepared with love – that’s what Belgium is famous for. Right? Not just that. For a while now, Belgium has also stood for trendy lights that not only look great, but that also have compelling inner values. State-of-the-art LEDs that feel equally at home in a cosy attic apartment or in the hippest club in the city. Because they save space, save resources, and offer greater quality of life. And that is exactly what we at Wever & Ducré want. Where do we get our inspiration? From people like you who share our passion for beautiful things and who attach just as much importance to appealing design as to high-quality construction. And to make sure that our customers get our cool, high-quality luminaires as quickly as possible, we deliver promptly right from our warehouse – straight from Belgium with love!

IT’S EASY.

When a product is truly good, it doesn’t need bells and whistles. Especially not to show it off. In this, we agree entirely with Bernd Steinhuber. Which is why we left the design of our fair stand to the Austrian architect and designer, simply telling him: “You’ll do fine.” The result? A stand that is just like us: creative, unconventional, and a little crazy. Built spontaneously of scaffolding, a few comfortable pillows, and plenty of boxes. Because everyone who visits us should just have a good time.

SPOT ON...

...was the motto for Wever & Ducré back in the ‘80s when a couple of young Belgians decided to found Europe’s first designer lamp company. In the middle of the Mecca of international light design: Roeselare, Belgium.

We work here with artists and designers to create new, creative LED lighting solutions that not only look great, but also have plenty to offer when it comes to quality. It’s no wonder that Wever & Ducré has already captured a number of design awards.

reddot award 2015

New Products

RELIVE THE EIGHTIES IN A WHOLE NEW LIGHT.

These spotlights capture the quintessence of that legendary era – in all its inimitable style. That's why we've created a smart new edition of these handy little luminaire heads – complete with leading-edge LED technology, a delicate swivelling joint, and plenty of retro charm. Do you like what you see? The only thing left to decide about this classic lighting element is if you prefer track lights or base lights. And, of course, which version better suits the ambience of your bar – the LED COB or the PAR16 retrofit version.

SARA

ON POINT.

Whatever you want to draw attention to – the TORCO luminaire will bring it to light. Subtly, effectively, beautifully. Thanks to the latest LED COB technology, this modern spotlight is elegantly slim and fits perfectly into any interior design environment. From a private living room to a posh restaurant. This luminaire includes a special additional feature – the integrated snoot, which gently reduces the glare of the light.

TORCO

TWICE THE LIGHT FOR DOUBLE THE POSSIBILITIES.

Because some people just can't get enough of these spotlights, the surface mounted SQUBE on base is now available in a double version – SQUBE on base #2. This means you can create two separate highlights with one simple hand movement. This elegant spotlight, which is attached to a shapely mounting plate, is available in two versions – LED COB or the PAR16 version.

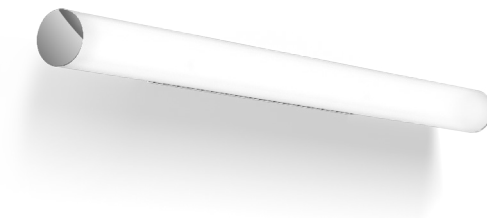

SQUBE #2

New Products

THE FORCE IS WITH YOU.

Don't be deceived. What at first glance looks like Luke Skywalker's lightsabre is actually a clever bathroom luminaire that provides perfect illumination for any time of day. And MIRBA and MIRBO have a lot more going for them. Their slim aluminium track – which also comes in a square version – can be easily fitted to any mirror. Are you starting to see the light? This moisture-proof luminaire (IP44) can be ordered in lengths of either 450 mm, 600 mm, or 900 mm.

MIRBA & MIRBO

HELLO SWEETY!

This delicate luminaire made of porcelain features a downright delicious look. And it does just as well in the kitchen as in the bedroom, because SELOs colour temperature (1,800–2,850 K) can be adjusted flexibly to create just the right mood. From bright and friendly to subdued and romantic. Which is why the fine luminaire is also right at home in restaurants or bars – where it can demurely watch young lovers flirt. SELO is available with a fluted or smooth surface. For an elegant or more rustic look. Whichever you prefer.

SELO

OUR FAVOURITE BROWNIE.

Looking for a little bit of retro charm? Then WETRO is perfect for you, because this hand-blown luminaire can also be easily extended into a chandelier when hosting a dinner with friends. How does it work? Quite simply. With different luminaire sizes that can be combined for any occasion. And in case you always wanted to know where WETRO gets its beautiful colour, here's the trick: The glass body is plated in copper or vapour coated in black. This lends the luminaire a unique flair that steals the show in bars or restaurants – or anywhere else.

WETRO

New Products

FORTUNA SENDS HER REGARDS.

SHIEK bathes every room in golden light. And not just in the morning, because gentle mood lighting (1,800–2,850 K) pours forth from the minimalistic funnel shape at any time of day, illuminating your favourite spot. Or your dining table. Depending on where you want to place this unique jewel. Sounds good? Then you'll be pleased to learn that SHIEK is also available in other colours. Inside (gold or copper) and outside (copper, black, gold, or white). So you can create exactly the effect you want with this elegant piece no matter where you place it.

SHIEK

NEW BEST FRIENDS.

Anyone who says “diamonds are a girl's best friend” doesn't know our WIROs yet! Because the stylish luminaires by architect and designer Bernd Steinhuber will take your heart by storm. They look like a sketch drawn in the air and can be hung individually or as an ensemble – even in different sizes. So pick your favourite shape and combine away! Give your imagination free rein with diamond, globe, and industry. Including for the light ambiance. Because these crazy lights are also as flexible as can be in this regard.

WIROS

WILL YOU LOOK AT THAT.

Do you feel like you are being watched? Not to worry. STIPO isn't spying on you. It's just putting you in the spotlight. Because the clever light only looks like a surveillance camera. In reality, it is a little wonder of technology that sets the perfect scene for all of the objects in your garden. And because it can be mounted almost invisibly, it ensures that the eye is drawn to what is really important: the sculpture by your favourite artist. Or the garden gnome from your grandmother.

STIPO

New Products

ATTENTION GETTER.

Your friends no longer look you in the eye? Maybe because of BLAS. The extravagant light is most certainly a sight to behold. Especially in the bathroom or on the terrace where you want bright light. But the massive glass block not only grabs your attention because of its great design. It is also remarkably flexible. You can mount it on the ceiling or on the wall. And thanks to its diffuse light, it provides optimal illumination in every room. It's definitely worth a look!

BLAS

SPOT ON.

Even if you don't have a red carpet in your living room, this spotlight makes you a star. Because SNEAK TRIM / SNEAK TRIMLESS casts beautiful things in the best possible light. Without coming to the forefront itself. Not because it is so shy, but because it melds seamlessly into the ceiling – with or without a border. That's why you only notice it when you take a careful look. Which you can of course do as often as you like. Because SNEAK TRIM / SNEAK TRIMLESS not only looks stylish, but also does not blind you when you look at it.

SNEAK TRIM/ SNEAK TRIMLESS

BEAMING WITH JOY.

Do you have big dreams and a small apartment? Then CITY is the perfect room-mate. Because the elegant luminaire makes even the smallest of apartments a grand place to be. The trick: CITY can be recessed seamlessly into the ceiling. So even low ceilings are no problem. And because it is so easy to install, you can even do it when you're all thumbs. So give it a try. You can do it!

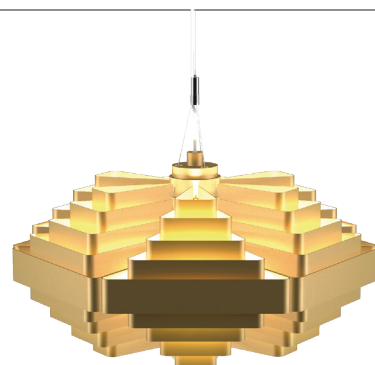

CITY

BACK TO THE FUTURE.

Can you hang your dreams from the ceiling? Belgian star designer Jules Wabbes (1919–1974) answered this question with a resounding yes and timelessly classic design back in the 1960s when he created his JJW 042. Exquisitely stylish – the sophisticated refraction of light created by the cascading light formation is every bit as breathtaking today, regardless of whether you opt for the gold or the aluminium version.

JJW 042

THE UNEXPECTED.

A concrete luminaire – for many a glaring contradiction that we set out to rectify. With a new, innovative process that eliminates the problematic characteristics of concrete. The result: BISHOP. A unique light that bathes the room in a candle-light ambiance. Ideal for ending the day with a drink. Alone or in company. Because the concrete light is certain to make a better impression than your record collection. It is available in black-gold, white, and grey.

BISHOP

HOWEVER YOU LIKE.

Regardless of whether you choose the round, square, soft, or hexagonal design: These luminaires will always put a smile on your face. Why? Because they fit perfectly into any environment. Not only in terms of form. They are also highly flexible in terms of application and colour. As surface-mounted, wall, or suspended luminaires. In gold, black, white, bronze, aluminium, and in trendy copper too – the choice is yours. Plus, all of these luminaires are also available in various LED light colours ranging from 1,850 K to 3,000 K. This allows you to plan every room in your hotel in the same style, highlight architectural concepts, or create the perfect ambience at home.

I COMBINE...

With VENN, the designers Serge & Robert Cornelissen are taking the approach of the BEBOW collection to a whole new level. What this means for you is that three in one equals more. Or to put it more precisely: as much as you want. VENN represents design that not only catches people's attention, but is also functional. Multifunctional. So that it provides either indirect lighting or direct and indirect lighting. But the best thing about VENN is that several luminaires can be combined with one another: placed next to each other or overlapping, mounted on the wall or ceiling, or in a suspended configuration. How exactly you use them and how many you use is entirely up to you.

VENN

OUTSTANDING!

Wever & Ducré collaborated with the renowned design studio 13&9 for the ROCK COLLECTION. And we are pretty proud of this. Because the co-founder of the studio, Martin Lesjak, was named designer of the year 2015 by the American CONTRACT MAGAZINE. What makes ROCK so special? It is a fusion of light and furniture – in various modular sizes and proportions. This provides countless possibilities for design and use. And what is most special is that the luminaires feature ultra-thin veneers made of natural shale, available in three different colours. The frames are milled out of varnished MDF. Which makes each luminaire truly unique.
